COLLEGE

OF THE

Immaculate Conception,

NEW ORLEANS.

FORTY-EIGHTH YEAR.

THE COLLEGE of the Immaculate Conception, conducted by the Fathers of the Society of Jesus, was founded in December 1847; and in March, 1856, was endowed by the Legislature of the State of Louisiana, with the full powers and privileges of a University.

The plan of studies embraces the Doctrines and Evidences of the Catholic Religion, Logic, Metaphysics, Ethics, Astronomy, Natural Philosophy, Chemistry, Mathematics, Rhetoric, Composition, Elocution, History, Geography, Arithmetic, Penmanship, Book-keeping, the Latin, Greek, English, French, German and Spanish Languages. The arrangement of these studies is as follows:

I.

Post-Graduate Course.

The Post-Graduate Course of Lectures was introduced in the month of November, 1886, and it has since continued with good results.

Sociology, Natural and International Law, Political economy and General Physics are the subject-matter of the Lectures.

The Annual Course opens on the first Monday of October and closes at the end of April. The general subject-matter will be distributed over several years, so as to vary the treatises of those who may desire to attend for more than one term.

At the termination of the complete Course, such members of the class as have given satisfaction by regular attendance may apply for the Degree of Bachelor of Philosophy, which will be granted on condition that they pass an examination on Theses, to be selected from the matter developed during the Course, and present an original and creditable paper on a given subject.

The Degree of A. M. will be bestowed after one term of Post-Graduate Lectures, faithfully and studiously attended, on those who have previously received the Degree of A. B.

Graduates of the College, or of any College of the same grade, students of Law or Medicine, and gentlemen of literary or scientific culture, will be admitted to the above Course.

II.

Classical Course.

The Classical Course, which leads to the Degree of Bachelor of Arts, is designed to impart a thorough, liberal education. In the accomplishment of this purpose, the Ancient Classics hold the first place, because some acquaintance with them is essential to the study of modern literature and to sound scholarship. Besides Latin, Greek and English, it embraces Religious Instruction, Mental and Moral Philosophy, Astronomy and Mathematics, History, Literature, Book-Keeping, and the Natural Sciences. It has been found by long experience that this is the only Course that affords unsurpassed mental discipline, forms a correct taste, and prepares the student to excel in any pursuit, whether professional or commercial.

III.

Commercial Course.

This Course offers the means of acquiring a good English or Commercial education. It embraces Book-Keeping, a thorough study of Arithmetic, Algebra, Grammar, Style, practice in Composition, English, and Religious Instruction. At the

end of the Course, a Commercial Certificate is awarded to those who pass a satisfactory examination. Moreover, the Degree of Bachelor of Science will be conferred upon those who successfully devote two extra years to the study of Literature, Philosophy and Natural Sciences.

IV.

Preparatory Department.

This Department comprises the First and Second Preparatory and two Classes of Rudiments. Its object is to introduce the younger pupils to the study of the first principles of Grammar, chiefly by class-drill; to form them to habits of attention and application, and thus prepare them for one of the regular Courses of Instruction.

Requirements for entering this Department are:

First.—The applicant must know how to read, write and spell creditably.

Second.—He should know Arithmetic as far as Long Division, included.

RELIGIOUS TRAINING.

The College authorities are convinced that, without Religion, there can be no education, in the true sense of the word, that is to say, no complete and harmonious development of the intellect and heart of man. They hold, furthermore, that religious truth, being definite and certain, like any and every other truth, is as susceptible of teaching as the science of language, or the theory of numbers. Hence, the Catechism of Christian Doctrine is a text-book in every class, and lectures on it are given twice a week. In all the classes the day's work begins and ends with prayer. The Catholic Religion alone is taught, but non-Catholics will also be welcome and their religious opinions studiously respected. Catholic students go to Confession the third Saturday of each month, then on the following Sunday, in the Church annexed to the College, hear Mass and receive Holy Communion.

General Regulations.

ADMISSION.

Every Student who applies for admission must furnish testimonials of good moral character, unless he be personally known to some member of the faculty; and should he come from another institution, he will be required to bring satisfactory evidence of blameless conduct. He is then examined by the Prefect of Studies, and assigned to that class for which his previous attainments have qualified him.

The session is divided into four terms. The first begins on the first Monday in September, the second on the fifteenth of November, the third on the first of February, the fourth on the fifteenth of April and closes towards the end of June.

LEAVING THE COLLEGE.

Parents who wish to withdraw their sons before the end of the session are respectfully requested to give due notice of their intention to the Vice-President. Many inconveniences will thus be avoided, and order secured. Should any student leave of his own accord, or be withdrawn without such notice, or without giving satisfactory reasons, he will not be re-admitted. On leaving, students should take their books, etc., with them, as the College is not responsible for any articles left behind.

EXAMINATIONS.

Four examinations are held every year, one at the end of each term.

PROMOTIONS.

Though promotions may take place any time during the year, whenever warranted by the progress of the student, the usual time is the beginning of the school year. These promotions depend partly on the final examinations, but mainly on the general class standing during the preceding year. A student of ordinary talent, and steady application during the entire session, may be easily promoted, provided he returns promptly when classes are resumed. Should he not be promoted, it is usually a sign that he did not attend regularly during the entire session, or that he did not devote sufficient time daily to home study. Should a student fail in the final examination, he will be offered the privilege of passing a private examination during the vacation, if his yearly average warrant the concession.

COMPETITIONS.

Competitive exercises are given quarterly in the various branches, the results being read publicly in the presence of the faculty and students, and the leaders rewarded for their proficiency.

To lend interest to these announcements, as well as to accustom the students to appear in public, the proceedings are varied with declamations, original speeches, vocal and instrumental music.

Testimonials of good conduct and diligence are given regularly to deserving students. Parents should require these evidences of good behavior, and if not forthcoming, take an early opportunity of visiting the Vice-President, to inquire why their sons fail to receive merit cards.

MODERN LANGUAGES.

The study of the French Language is a part of the College Course. The study of German and Spanish is optional and entails no extra charge.

Fees and Expenses.

Tuition per month, payable in advance	$ 6 00
Use of Chemicals, etc., *per annum*	10 00
Classical Diploma	10 00
Commercial Certificate	5 00

N. B.—No deduction is made for any absence less than half a month.

Books and stationery are furnished by the College at current prices.

Special Regulations.

THE ATTENTION of students is specially directed to the important duty of *home study*. Since recitations in the various branches fill up almost all the school hours, it is very difficult to advance, and utterly impossible to accomplish the work laid out for each year, unless the student devotes at least *three hours daily* to class study at home. Parents are exhorted to insist on this indispensable duty, and inform the faculty, should their sons neglect it.

Home study.

After home study the next duty which should claim the attention of students and the vigilance of parents is punctuality. Severe illness or absence from the city is, generally speaking, the only excuse admissible for staying away. Whenever parents keep their sons at home, on account of sickness or for any other good reason, they are requested to send a postal card to the Vice-President. Frequent absence so rapidly lowers a student's class standing, that the faculty prefer he should be withdrawn entirely.

Punctuality.

Owing, moreover, to the serious inconvenience resulting to professors and students from breaking in on class-hours by withdrawal before the end of the afternoon class, permission to leave College will not be given, unless for reasons deemed imperative by the Vice-President.

Attendance the whole day.

If parents do not insist on home study and punctual attendance, they need not be astonished if their sons remain a second year in the same class, or, perhaps, be refused re-admission.

Along with moral and mental training, the faculty lay great stress on the development of the manners of perfect gentlemen, and consider the rules of politeness a very important part of the course of studies. Whatever, therefore, is contrary to good breeding, is out of place in College. Consequently no boisterous conduct or rough play is tolerated

Politeness.

on the premises, and silence is strictly enjoined in the class-rooms, and on the corridors or stairways leading thereto. Any ungentlemanly conduct among the students themselves, any disrespect or insubordination to a professor or officer of the College, shall be visited with severe punishment, and even with dismissal should the gravity of the offense require such a penalty.

For faults of ordinary occurrence, such as tardy arrival, failure in exercises or recitations, slight violations of rules: detention after class, or the task of writing or memorizing some lines from an author, is deemed a sufficient penalty.

For faults committed outside of the premises, the officers of the College are by no means responsible, as students cease, then, to be under their jurisdiction; still, should any serious charge be fairly substantiated, the guilty shall be punished according to the gravity of the offense.

Penalties.

Damages to the College property will be repaired at the expense of the offender.

The use of profane language or anything bordering on immorality, will subject the offender to immediate expulsion.

Monthly Marks.

Once a month the marks of all the students are read out in the classes. These marks are the record of daily lessons, exercises and conduct.

Quarterly Reports.

A report of these marks is given to every student, that it may be signed at home by his parents or guardian. As these reports indicate exactly the student's class standing, the College requests that they be very carefully examined, and afterwards returned to the Professor. No student is allowed to open his report.

Tardiness.

The College is open at 8 A. M.; class begins precisely at 9. A student arriving after the 9 o'clock bell has rung, must report at once to the Vice-President, and cannot enter class without a note from him.

Written excuses for lessons or exercises fall under the same rule as notes for absence: a student not prepared to recite is considered as morally absent, and is marked accordingly. Such excuses are to be handed to the Prefect of Studies, who will decide whether, in some special instance, they are to be admitted.

Written excuses for Lessons.

No student, unless for serious reasons, will be allowed to take his lunch outside the College limits. Parents are requested not to ask this permission if it can be possibly avoided.

Luncheon.

Thursday is the weekly holiday, but should an extraordinary holiday fall on Tuesday, Wednesday, or Friday, classes may be continued on Thursday, as usual.

Recreation.

Dress. All are expected to be clean and neat in person and apparel.

Mathematical Course.

FIRST CLASS.

Wentworth's Geometry completed.

Plane and Spherical Trigonometry.

SECOND CLASS.

Wentworth's Algebra reviewed.

Wentworth's Geometry; Plane Geometry.

THIRD CLASS.

Wentworth's Algebra repeated and completed.

FOURTH CLASS.

Wentworth's Arithmetic completed.

Wentworth's Algebra as far as Simple Equations.

FIFTH CLASS.

Wentworth's Arithmetic; Fractions; Compound Quantities; Percentage.

SIXTH CLASS.

Wentworth's Arithmetic as far as Fractions.

Examination Papers for the Degree of A. B.

1896.

Mental Philosophy.

DIALETICS.

Logic, its definition and division.

Simple apprehension: ideas; terms.

Judgments and proposition, their definition.

Argumentation; the syllogism, its laws.

Demonstration; hypothesis; induction, its methods. Sophisms.

CRITICAL LOGIC.

Certitude exists: therefore universal scepticism cannot be admitted.

Certitude can be more or less.

Judgments based upon the report of the senses cannot of themselves be false.

The immediate cause of our sensations is the *real* existence of bodies outside of us.

The understanding is free from all error:

1. When it pronounces an immediate judgment.
2. When it pronounces a proper mediate judgment.
3. When it exercises psychological reflection.

Evidence considered objectively or the necessary intelligibility of an object is the universal criterion of truth; therefore subjective evidence or a clear and distinct idea is not as Descartes taught the criterion of all natural certitude.

Distinguishing between dogmatic and historic testimony, we assert that there are circumstances in which human testimony about cotemporary facts is deserving of the fullest faith.

GENERAL METAPHYSICS.

The notion of Being in general is contracted to narrower spheres not by way of composition, (addition) but by a fuller expression of the same idea.

Being therefore is an analogous term, and not a univocal one.

The principle of contradiction, which springs immediately from the comparison of Being and non-being is the first of all principles.

The essence of things are not altogether unknown to us.

The notion of substance represents a reality.

COSMOLOGY.

The world was created.

The world is for God's extrinsic glory.

The world is not absolutely but relatively perfect.

Miracles are possible.

PSYCHOLOGY.

The human soul is simple.

The human soul is spiritual.

The human soul is incorruptible.

The human soul after its separation from the body exists forever.

The human will is free.

NATURAL THEOLOGY.

God exists, and His existence can be demonstrated by reason.

God co-operates, physically and immediately, with His creatures in all their actions. This co-operation neither destroys our liberty, nor makes God the author of moral evil.

There can be only one God.

God is absolutely immutable.

God is eternal.

God is omnipresent and without limit.

ETHICS.

God is the absolutely last end of all things.

Happiness is an act and not a state.

God's will imposes the law of morality upon us and holds us accountable for our observance of it.

The Eternal Law exists.

NATURAL LAW.

Internal worship is due to God.

External worship is due to God.

Suicide is forbidden by the Natural Law.

A lie is intrinsically evil.

Under certain conditions it is lawful, in self-defense, to kill an unjust aggressor.

Duelling is opposed to the Natural Law.

Natural Philosophy.

PHYSICS.

1. Transmission of pressure in liquids. Hydrostatic Press. Downward, upward and lateral pressure. Equilibrium of liquids in communicating vessels. Archimedes' principle. Specific gravity and its determination.

2. Properties of gases. Air pump. Barometer (Fortin's.) Mariotte's Law. Lifting and force pumps.

3. Production and condensation of Statical Electricity. Electroscope. Electrostatic induction. Leyden jar. Plate and Toepler-Holtz machines.

4. Principal primary batteries. Storage batteries. Electrolysis. Galvanometer. Ohm's law.

5. Magnets — their properties and laws. Inclination and declination compasses. Methods of magnetization.

6. Magneto-electric induction. Ruhmkorff's coil. The Dynamo. Morse's Telegraph.

7. Production, propagation and reflection of sound. Intensity, pitch and timbre. Resonance. Beats. Harmonics.

8. Ordinary thermometers. Fusion and evaporation. Latent and specific heat. Joule's equivalent. Steam Engine.

9. Laws of reflection and refraction of light. Images in concave mirrors and convex lenses, and their geometrical determination. Reflecting and refracting telescopes.

CHEMISTRY.

1. Elements. Compounds. Symbols. Molecular and atomic weight. Law of definite and multiple proportion. Composition by volume and by weight. Acids, bases and salts.
2. H, O, N, S: their principal properties.
3. Explain the manufacture of HCl, HNO_3, H_2SO_4 and state their uses.
4. C, CO, CO_2, CH_4, C_2H_6O, $(C_2H_5)_2O$, $C_2H_4O_2$. Illuminating gas. The sugar group.

MECHANICS.

1. Laws of motion. Uniform motion; uniformly accelerated motion. Their geometrical representation, formulæ and application to falling bodies. Atwood's machine.
2. Composition and decomposition of angular forces. Trigonometrical relation between two forces and their resultant. Composition of parallel forces.
3. Simple and compound pendulum. Its laws. Compensation pendulum. Projectiles.
4. Equilibrium of forces. Application to machines: levers, balance, wheel and axle, inclined plane.

ASTRONOMY.

1. Astronomical co-ordinates. Methods of finding terrestrial longitude and latitude. Parallax and distances of celestial bodies. Planetary motions. Kepler's laws. Chronology.
2. Solar system. Physical description of the sun. Names, distances and size of planets. Motions of the earth. The moon. Eclipses and tides. Nebular hypothesis.
